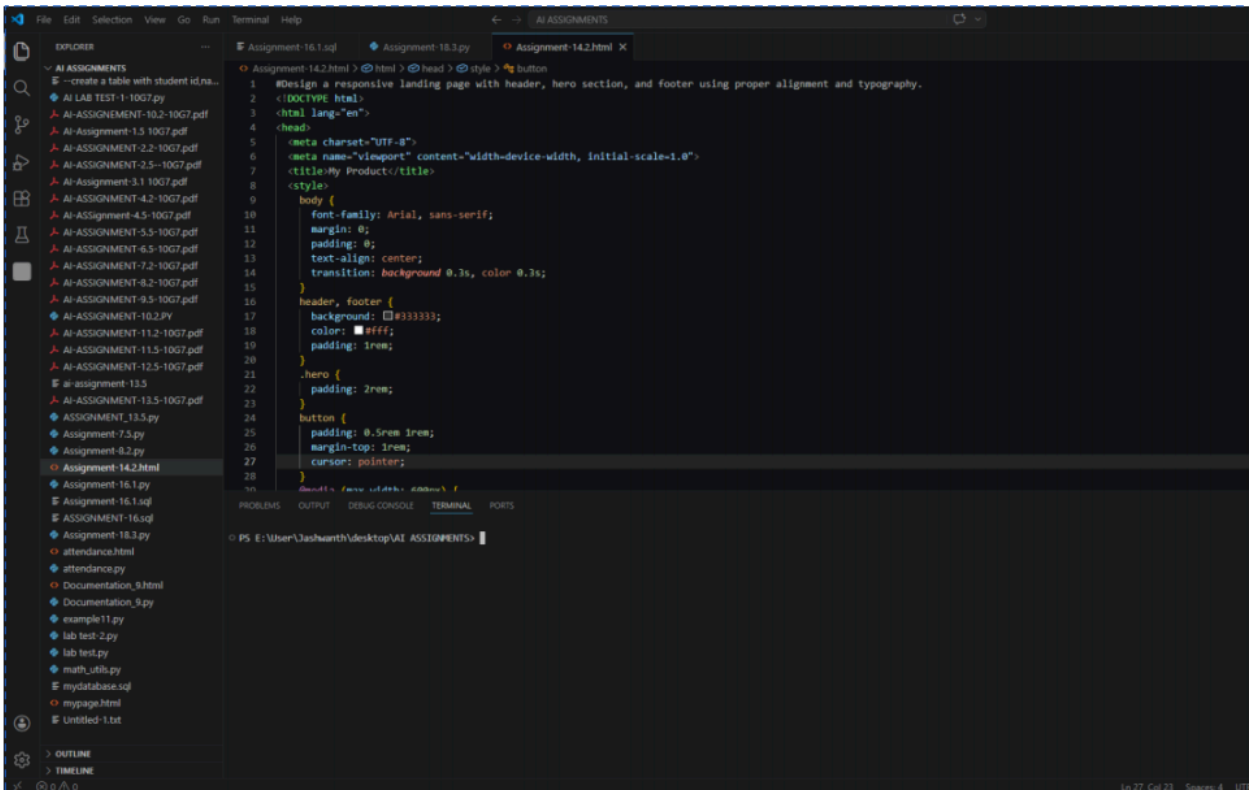
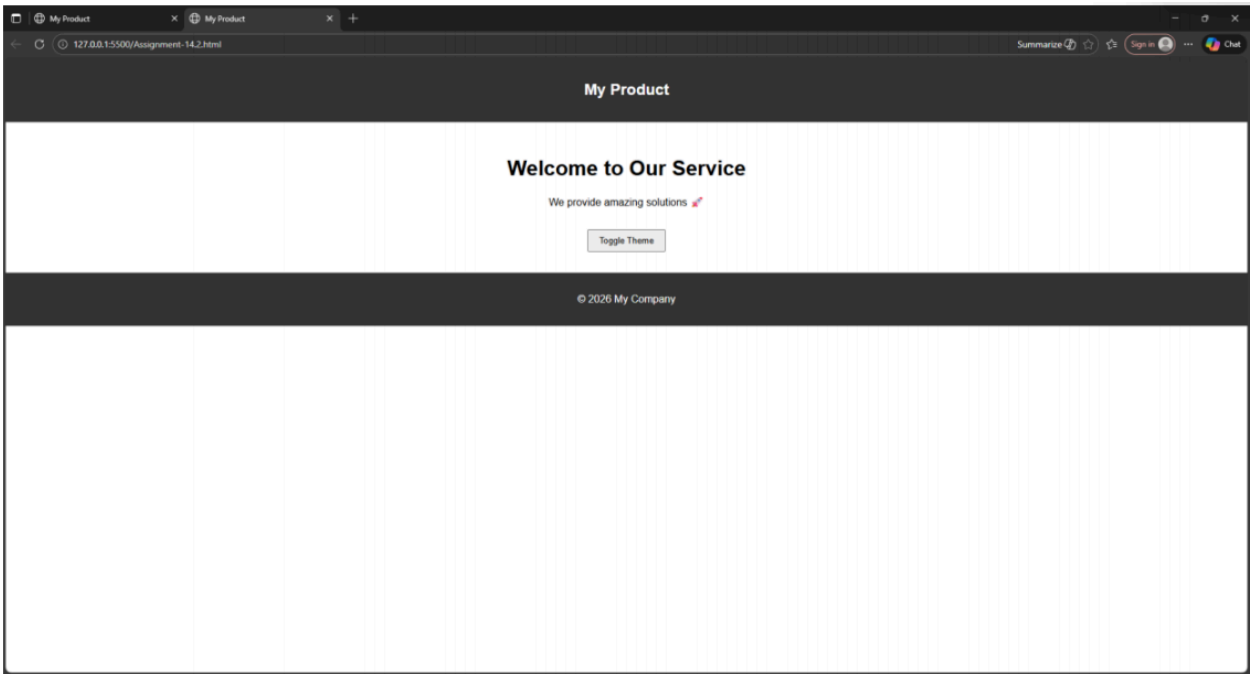
ASSIGNMENT-14.2
ROLL NO: 2303A51062
BATCH: 29

TASK-1:
PROMPT:
<!--AI Prompt:
"Design a responsive landing page with header, hero section, and footer using proper alignment and
typography."
-->
CODE:





OBSERVATION:

The page looks neat and well-structured with a header, hero section, and footer. It adjusts nicely on different devices, and the fonts make the text easy to read and pleasant to look at

.

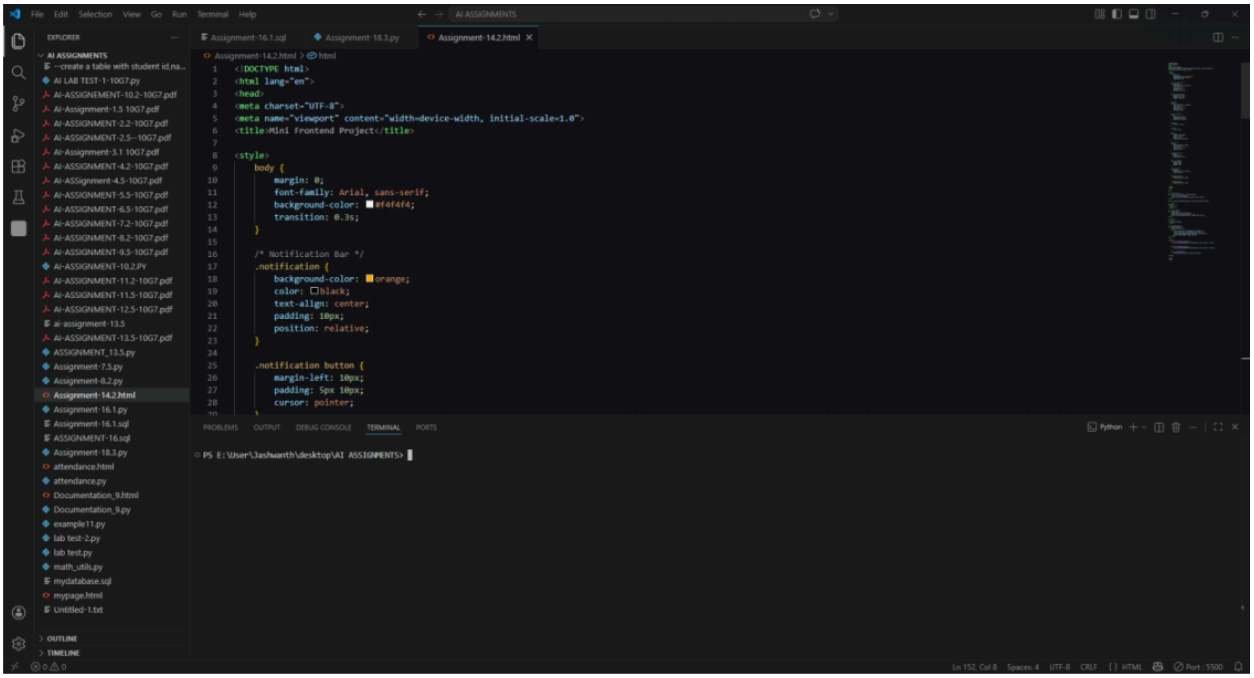
TASK-2:

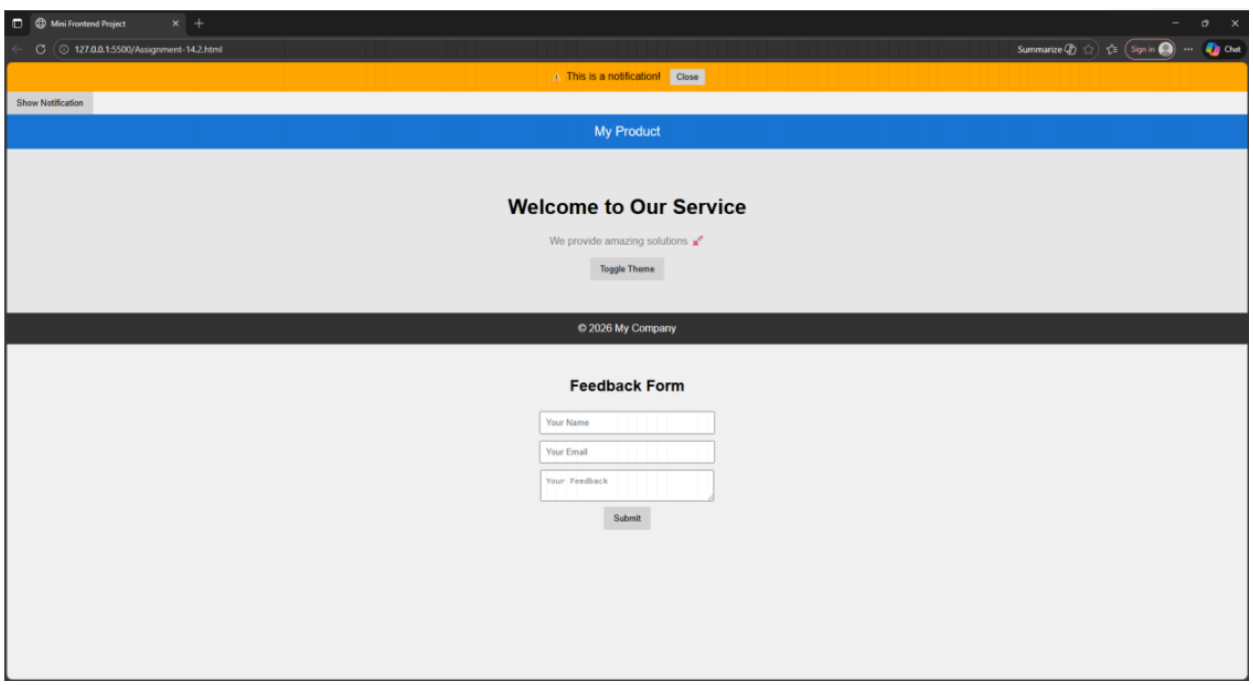
PROMPT:

<!-- AI Prompt:

"Create a theme toggle button using JavaScript and ensure
good color contrast for accessibility."
→

CODE:





OBSERVATION:

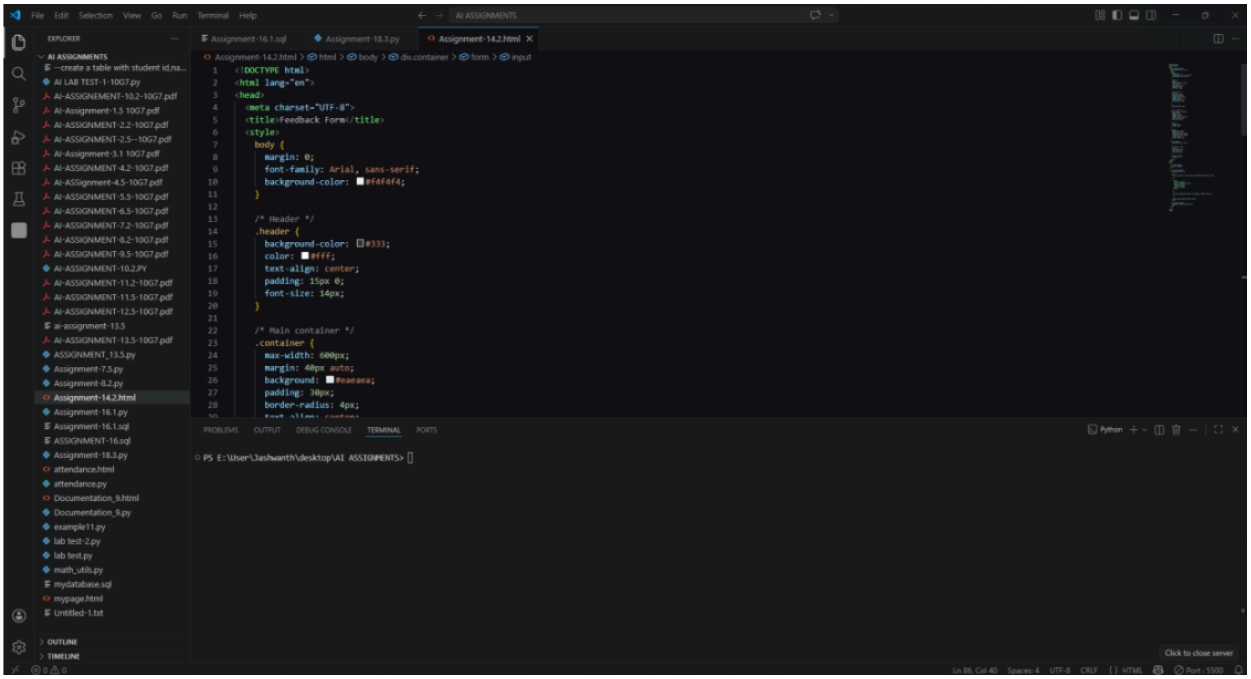
Clicking the button quickly switches between light and dark themes. This makes the
page easier to use for everyone, and the smooth transition gives a modern, polished feel.

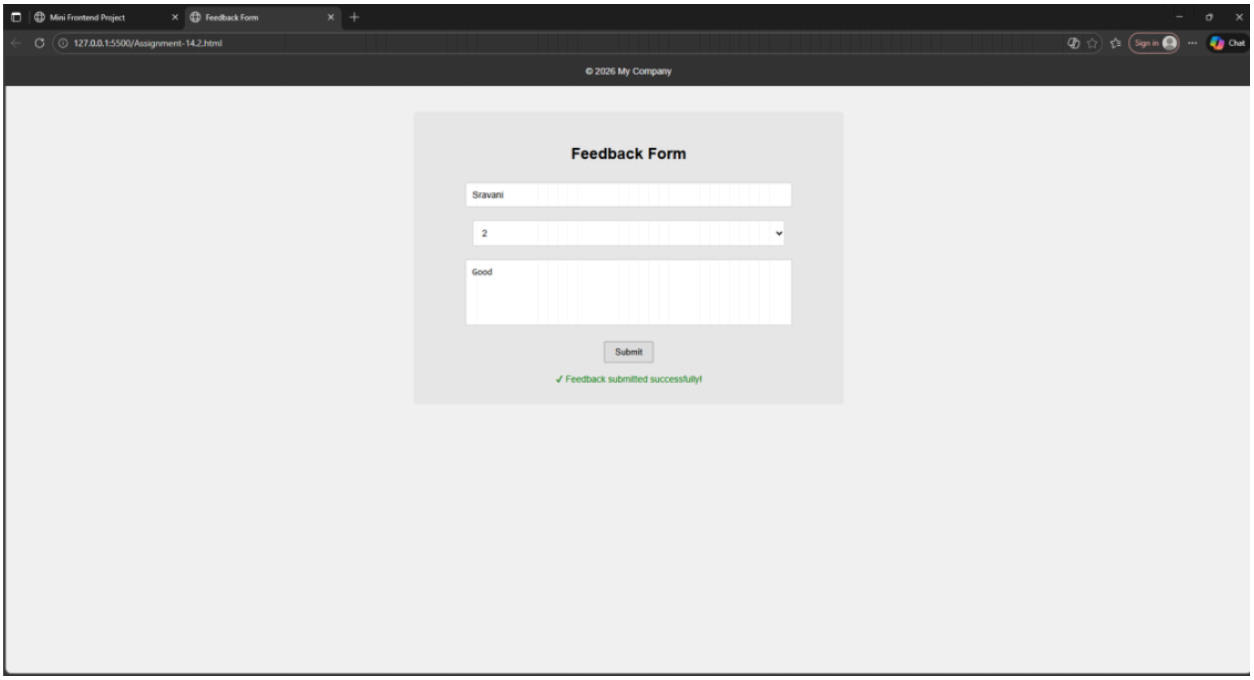
TASK-3:

PROMPT:

<!-- AI Prompt:

"Create a feedback form with validation and dynamic success/error messages using JavaScript."
-->
CODE:





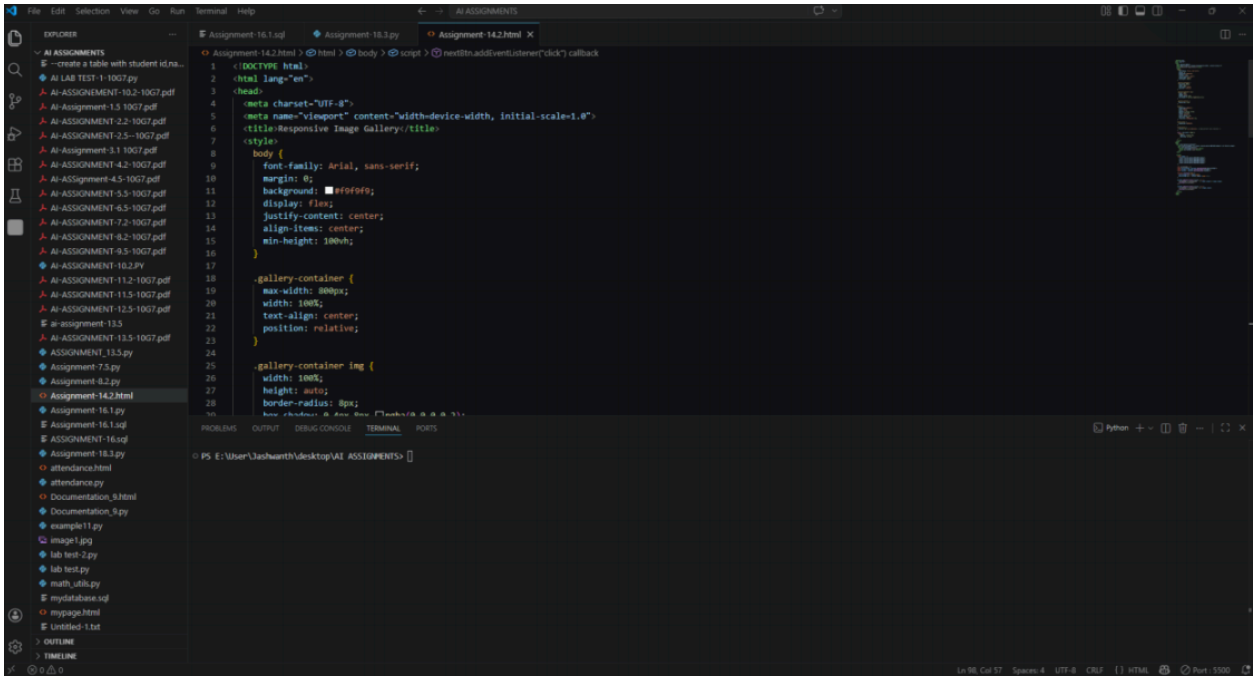
OBSERVATION:

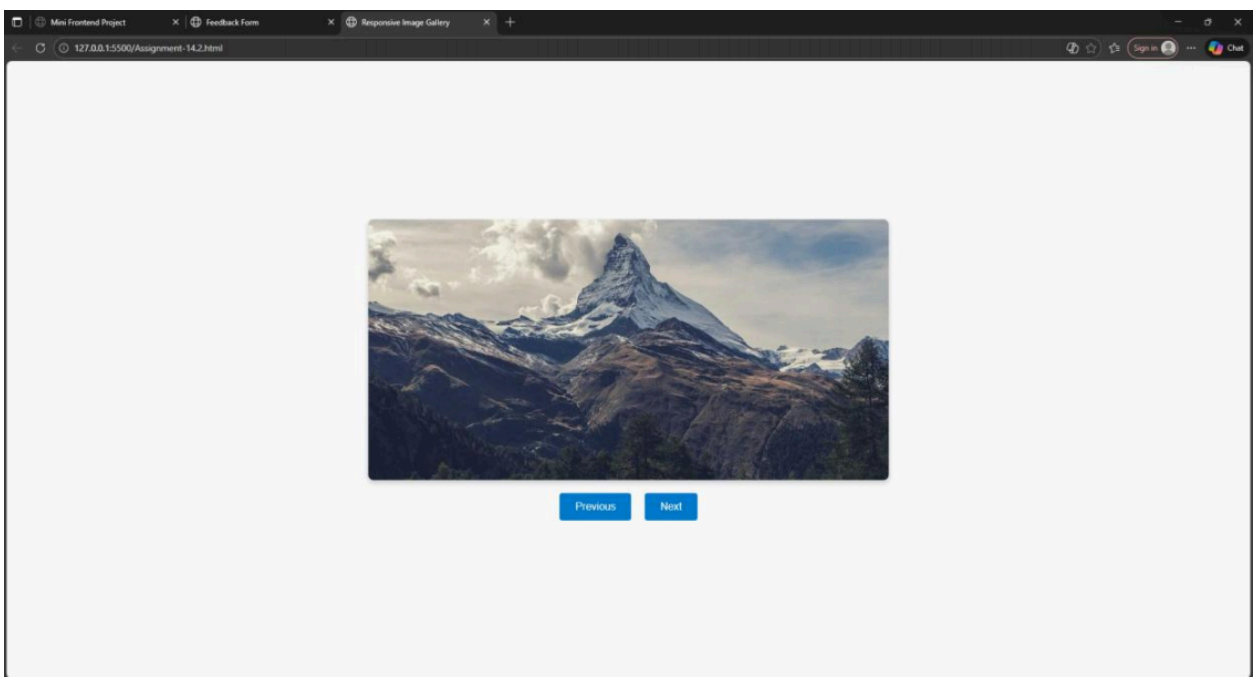
The form checks that all required fields are filled before submission. If something is
missing, it shows a clear error message, and if everything is correct, it shows a success
message. This makes the form more user-friendly and prevents mistakes.

TASK-4:

PROMPT:

<!-- AI Prompt:
"Create an image gallery with next/previous buttons using
JavaScript and make it responsive."
-->
CODE:





OBSERVATION:

The gallery lets you move through pictures using next and previous buttons. It works well

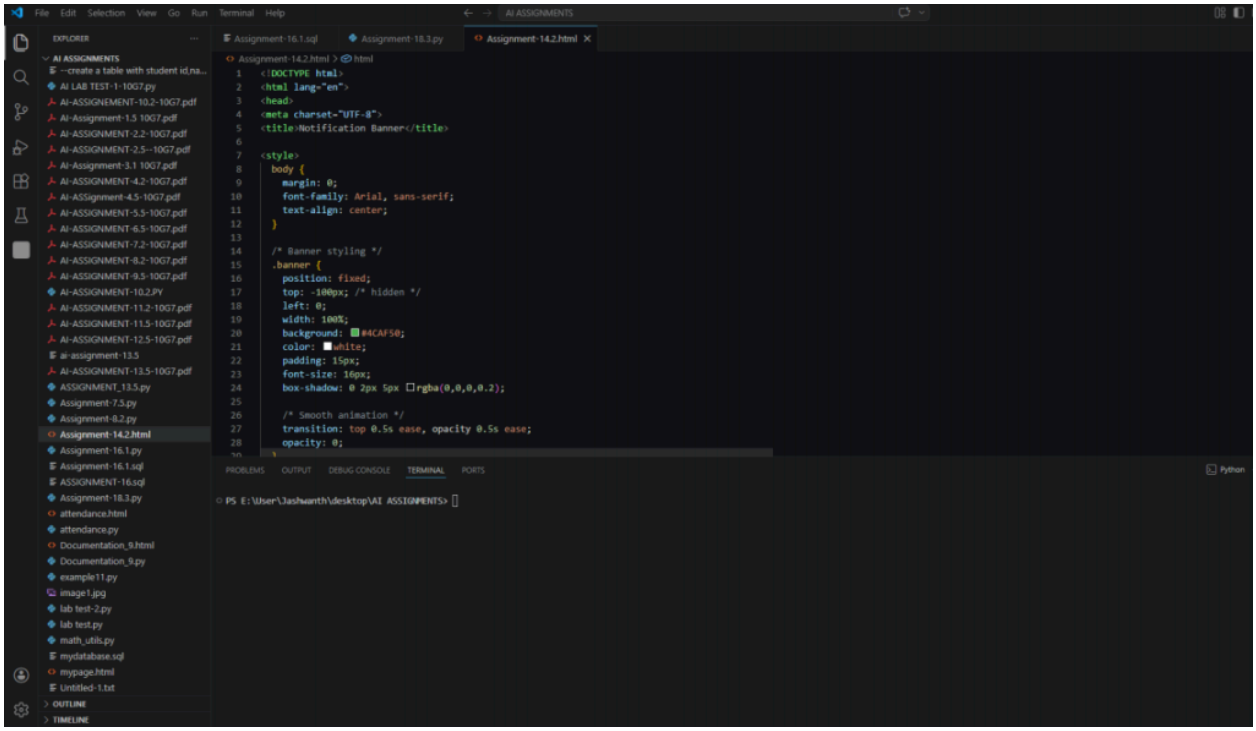
on both computers and phones, making it easy and enjoyable to browse images.

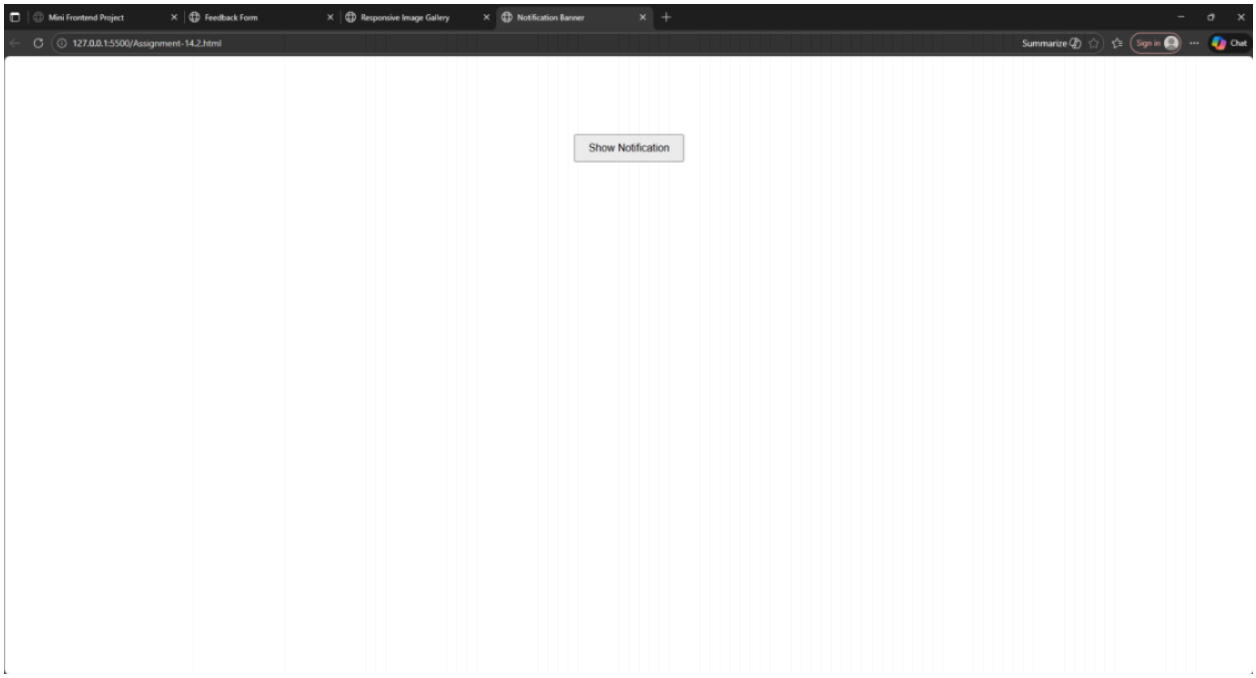
TASK-5:

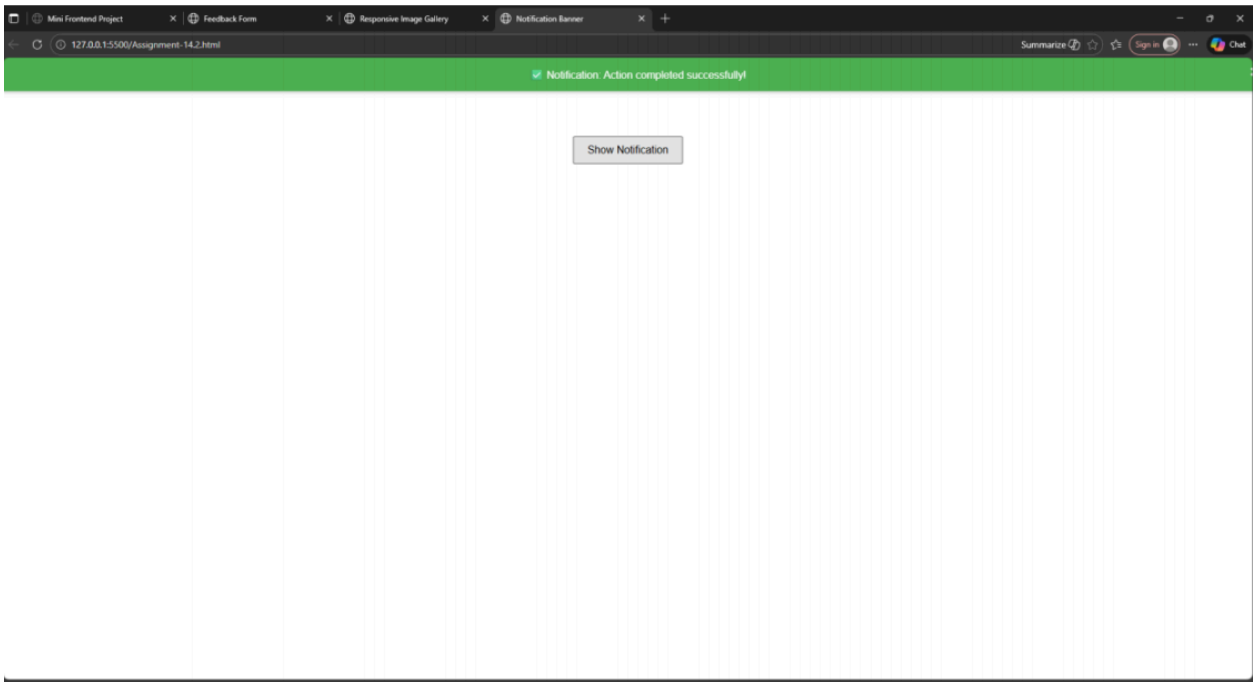
PROMPT:

<!-- AI Prompt:
"Create a notification banner with smooth show/hide animation using JavaScript and CSS."
-->

CODE:







OBSERVATION:
The banner appears smoothly at the top of the page when triggered and hides again

when dismissed. The animation makes it feel polished, and it’s a handy way to show
alerts or announcements without interrupting the rest of the page.
